

SUPPLEMENTARY ONLINE MATERIAL FOR

**Faunal dynamics across the Silurian-Devonian positive isotope excursions ($\delta^{13}\text{C}$, $\delta^{18}\text{O}$)
in Podolia, Ukraine: Comparative analysis of the Ireviken and Klonk events**

Grzegorz Racki, Andrzej Baliński, Ryszard Wrona, Krzysztof Małkowski, Daniel Drygant,
and Hubert Szaniawski

Published in *Acta Palaeontologica Polonica* 2012 57 (4): 795-832.
<http://dx.doi.org/10.4202/app.2011.0206>

SOM 1. Carbon and oxygen isotope and total organic carbon (TOC) data from the Silurian succession at Kytayhorod.

SOM 2. Inorganic geochemical data from the Silurian succession at Kytayhorod.

SOM 3. Carbon isotope (in organic matter) and total organic carbon (TOC) data from the Silurian–Devonian boundary succession at Dnistrove.

SOM 4. Inorganic geochemical data from the Silurian–Devonian boundary succession at Dnistrove and from Lower Devonian (Ivanie Beds) section at Zalishchyki and Ivanye Zolote.

SOM 5. Organic geochemical data from the Silurian to Lower Devonian localities of Podolia.

SOM 6. Chitinozoan.

SOM 7. Conodont ecological data.

SOM 1

Carbon and oxygen isotope and total organic carbon (TOC) data from the Silurian succession at Kytayhorod (see Text Fig. 6; in case of repeated analyses of the same sample, more positive values are selected only as being less diagenetically altered; see e.g., Małkowski et al. 2009).

SOM 5

Organic geochemical data from the Silurian to Lower Devonian localities of Podolia.

Sample	CPI	CPI(25-31)	Pr/Ph	Pr/n-C17	Ph/n-C18	SCh/LCh
SD-31/ Kytayhorod	1.40	1.48	1.10	1.35	0.76	13.11
SD-30/ Kytayhorod	1.46	1.44	2.41	1.55	0.60	9.88
SD-16/ Dnistrove	1.48	2.01	1.25	1.19	0.81	10.94
SD-33 Za6/ Zalischyki	1.68	1.54	1.57	0.92	0.69	16.16

CPI = Carbon Preference Index: $0.5 [\Sigma(C_{25}-C_{33}) \text{ odd} + \Sigma(C_{23}-C_{31}) \text{ odd}] / \Sigma(C_{24}-C_{32}) \text{ even}$.

CPI(25–31) = Carbon Preference Index for n-alkanes from 25 to 31 carbon atoms in the molecule: $(C_{25}+C_{27}+C_{29})+(C_{27}+C_{29}+C_{31})/2(C_{26}+C_{28}+C_{30})$.

Pr = Pristane; Ph = Phytane; Pr/n-C17 — pristane/n-heptadecane ratio, Ph/n-C18 — phytane/n-octadecane ratio.

SCh/LCh = short chain to long chain n-alkanes ratio: $(nC_{17}+nC_{18}+nC_{19})/(nC_{27}+nC_{28}+nC_{29})$.

SOM 6
