

Some new megaspore species of the Triassic of Poland

Ryszard Fuglewicz

Acta Palaeontologica Polonica 25 (2), 1980: 233-241

Six new megaspore species from the Triassic deposits of the non-alpine Poland and one species from the Tatra Mountains are described. Most of the species are derived from the Keuper deposits (Lettenkohle and Schilfsandstein).

Key words: Megaspores, Triassic.
