

Discovery of Ordovician land plants

Roman Kozłowski and Pal Greguss

Acta Palaeontologica Polonica 04 (1), 1959: 1-9

In Ordovician erratic boulders land plants remains were found. They could be considered as more primitive than Psilophytales, and probably as the most primitive land plants. Two new genera: *Musciphyton* gen. nov. and *Hepaticaephyton* gen. nov. are distinguished.
