SUPPLEMENTARY ONLINE MATERIAL FOR

**A monospecific assemblage of terebratulide brachiopods  
in the Upper Cretaceous seep deposits of Omagari,  
Hokkaido, Japan**

ANDRZEJ KAIM, MARIA ALEKSANDRA BITNER, ROBERT G. JENKINS,  
and YOSHINORI HIKIDA

Published in *Acta Palaeontologica Polonica* 2010 55(1): 73-84.  
doi:10.4202/app.2009.0068.

SOM. 3D reconstruction of *Eucalathis methanophila* Bitner sp. nov. based on transverse serial sections (Fig. 3) produced on Amira® software due to courtesy of Thomas Kunze. The file opens with Adobe® Reader® 9.0 and higher versions. Please note that that one branch of the loop is broken and slightly shifted on the presented 3D reconstruction. The transverse band was not preserved in the sectioned specimen and has been reconstructed.
