SUPPLEMENTARY ONLINE MATERIAL FOR

On the affinities of *Tetraceratops insignis*, an Early Permian synapsid

Eli Amson and Michel Laurin

Supplementary Online Material 1 : Matrix (Nexus format) modified from Liu et al. (2009) by the addition of characters from Laurin and Reisz (1996) displaying our interpretations of the anatomical characters discussed herein. This file (and Supplementary Online Material 2) is designed to be opened by a phylogenetic analysis software that uses the Nexus format, such as MacClade, Mesquite (Maddison and Maddison 2009), or PAUP (Swofford 2001).

http://app.pan.pl/SOM/app56-Amson_Laurin_SOM/Amson_Laurin_SOM1.doc

Supplementary Online Material 2 : Matrix (Nexus format) in which all characters for which the scoring of *Tetraceratops* is based on structures whose identification was questioned by Conrad and Sidor (2001) are scored as unknown (see description in the article).
