

Baranogale helbingi Kormos and other Mustelidae from the bone breccia in Podlesice near Kroczyce (Poland)

Kazimierz Kowalski *Acta Palaeontologica Polonica* 04 (1), 1959: 61-69

Description is given of the mandible of *Baranogale helbingi* Kormos and some meagre fossil remains of other Mustelidae: cf. *Vormela petenyii* Kretzoi and *Mustela* sp. from the Podlesice bone breccia. They are probably of the early Pleistocene (Villafranchian) age. Data available on the occurrence of *Baranogale helbingi* Kormos have been specified.
