ACTA PALAEONTOLOGICA POLONICA

Studies on graptolites II. On the development and structure of graptolite

Adam Urbanek
Acta Palaeontologica Polonica 04 (3), 1959: 279-338

This paper describes the astogeny and structure of *Gymnograptus linnarssoni* (Moberg) and *G. retioloides* (Wiman) and also the structure of *Gymnograptus* sp. The material has been etched from erratic boulders of Scandinavian origin, which are of Middle Ordovician age. The systematic position of the genus *Gymnograptus* is discussed.
