

***Palaeoconchocelis starmachii* gen. n., sp. n., an endolithic rhodophyte
(Bangiaceae) from the Silurian of Poland**

Susan Campbell, Józef Kaźmierczak, and Stjepko Golubić
Acta Palaeontologica Polonica 24 (3), 1979: 405-408

Palaeoconchocelis starmachii gen. n., sp. n. an endolithic microalga (Bangiaceae, Rhodophyta) is formally described. It is preserved both as a body fossil (the organism) and a trace fossil (the borings) in crinoid columnal fragments within carbonate rocks of Silurian (Ludlovian) age. The rocks were obtained from a core (the 544.9 meter depth) at Widowo near Bielsk Podlaski, Poland.

Key words: Bangiophyceae, Rhodophyta, taxonomy, U. Silurian, Ludlovian.
