

## The uppermost Devonian foraminifers of the Świętokrzyskie (Holy Cross) Mts., Poland

Ewa Olempska

*Acta Palaeontologica Polonica* 28 (3-4), 1983: 393-416

Thirty-one species of silicified foraminifers, representing thirteen genera, are described from the uppermost Devonian deposits of Kowala locality, Świętokrzyskie (Holy Cross) Mts. Two species are new: *Hyperammia eickhoffi* sp. n. and *Tolypammia minuta* sp. n. Most species belong to the agglutinating genera *Hyperammia*, *Thurammia* and *Tolypammia*. The stratigraphic position of this fauna corresponds to the upper part of the ostracod *hemisphaerica-dichotoma* Zone and conodont *costatus* Zones.

**Key words:** Foraminiferida, Upper Devonian, Poland.
